MARKET LEADING EVENT,  
HORTICULTURAL AND ARCHITECTURAL  
LED LIGHTING AND CONTROL

## MARKET LEADING EVENT, HORTICULTURAL AND ARCHITECTURAL LED LIGHTING AND CONTROL

*Novaldo is mainly concerned with exclusive wireless-controlled and battery-powered LED products such as spots, tubes and wall washers. We also have an unique application for PE objects and furniture. In our productrange we also have no-battery related LED products that are easy to operate wirelessly by our own free app, such as the Aldo LED Bulb and Aldo LED Downlight.*

Novaldo has amazed the LED industry with the development of extraordinary wireless products, light sources and the latest wireless control systems. We design and manufacture wireless-controlled and battery powered LED products. Our team, with over 35 years experience in this (international) business works including: specific entertainment lighting companies - architects - engineers - installation and lighting designers.

We are located in the Netherlands but operate internationally. Novaldo is always looking for new, high-quality products. Product specialists are constantly working on improving and expanding Novaldo's product range. The Novaldo sales team represents the complete product range. With its comprehensive product knowledge and experience, the team is able to quickly provide you with all the relevant information. Additionally, our product specialists have extensive technical expertise. You can always contact the Novaldo sales department office staff with any of your questions.

We stand for flexibility in production and service. We manufacture a market-leading mix of event-, horticultural and architectural lighting and control. We give you an added value by creating lighting solutions in numerous markets through compact design and powerful light sources. Our customers can rely on our quality, accessibility and service. We are constantly innovating our high-end LEDs and batteries in order to continue to amaze the LED industry.

Novaldo focuses on divers markets such as the event and entertainment industry, the hotel and catering industry, bungalow- parks and recreation as well as the consumer market, indoor and outdoor.

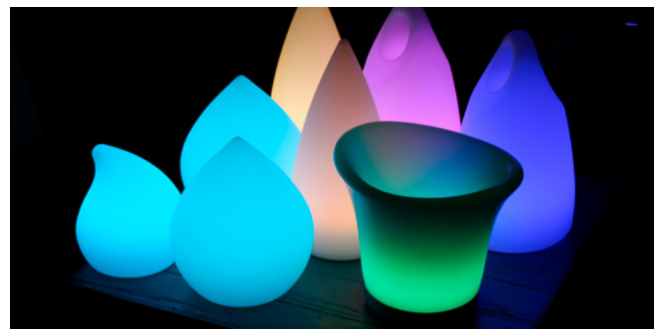

## NOVALDO QUALITY

The ALDO Furniture and Objects are realised from a high quality polymer composite. They are especially made for Novaldo so you can be sure that the furniture reflects the light perfectly. For our ALDO Furniture and Objects we have several wireless, battery operated ALDO LED spots which are easily installed in the ALDO Furniture and Objects.

### LED SPOTS WHICH YOU HAVE NEVER SEEN!

The different types of LED spots are wireless controlled. The LD4 spot is controlled by infra red and the LD6 and LD8 spot you can control easily with our Novaldo apps which you can install on your smartphone or tablet. The LD6 and LD8 spots gives you the opportunity to create the perfect light colour. You aren't stuck to 'just' 10 chosen colours, but you really can create your own perfect colour. It gives you a perfect brightness and variety of colour effects. And with the easy lock-in system they are simple in use and to be charged.

### GIVE IT A GLOW!

You consider your garden as an extension of your house. So you want to create the same cosy atmosphere outside. Luxury and comfort are key words for relaxing and enjoying long evenings with family and friends. And what about special events like weddings and parties? It is important to create an environment where everybody feels happy. So you can give your event that extra glow. The Aldo Furniture and Objects combined with our LD series give you the opportunity to create a special setting for every occasion. Wireless, controlled with your smartphone, tablet or remote control and the possibility to create your favourite colour at any moment.

## NOVALDO APPS

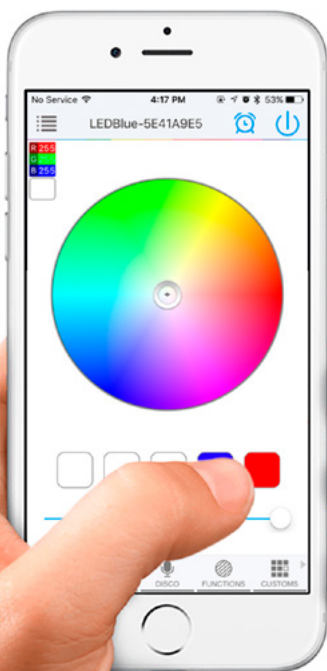

The Novaldo apps are FREE downloadable and compatible with IOS and Android.

### NOVALDO CLASS BLUE

Controls your Bluetooth light fixtures directly from your smartphone or tablet.

### NOVALDO CLASS WI-FI

Controls your Wi-Fi light fixtures directly from your smartphone or tablet (router is required).
